Men and Apes, Ramona and Desmond Morris, February, p. 146.

Zoom for Two!

Ingenious? Yes! Pays off big, too . . . in better teaching, faster learning. It's an exclusive, double-viewing head. Student and teacher or two students see the same specimen simultaneously. And, with advanced Wide Field Zoom, too. You both maintain visual contact with the specimen as you zoom through a continuously variable range of powers from $100\times$ to $500\times$.

You see quickly and clearly the specimen detail you want at the right magnification. It's an exciting, dramatic new teaching tool for students and teachers. You get it *only* with the new Bausch & Lomb Academic 255 High School/College Microscope. Write for complete information in Catalog No. 31-2172. Bausch & Lomb, 71812 Bausch St., Rochester, N.Y. 14602.

BAUSCH & LOMB 

SCIENTIFIC INSTRUMENT DIVISION

ADVANCING ELECTRONIC/OPTICAL
INSTRUMENTATION

Phipps & Bird/Physiology Equipment Kit

This Phipps & Bird Kit contains the necessary instruments to perform experiments in physiology.

This widely accepted teaching aid for high schools and colleges, is housed in a durable metal case. There are three models: PK#1 for smoke writing, PK#2 (with smoking stand and burner included, and PK#3 for ink writing. Manual included.

Full line of accessories and related instruments available

TIRED OF

"CROAKING"

WITH FORMALDEHYDE?

With new NASCO-GUARD* preserved specimens, objectionable formaldehyde odors, and painful skin reactions, are **things of the past.**

Because NASCO-GUARD preserved specimens are ODORLESS and NON-TOXIC, they are pleasant to work with, and remain completely flexible, joints move easily, tissues stay supple and life-like. Dreaded dissection sessions become fascinating experiences . . . the high point of interest in any biology course.

Write today for a complete listing of the NASCO-GUARD preserved specimens available from Nasco . . . the 26 year "old" reliable company with "new" ideas for education.
